

InSync Earns Powered by SAP NetWeaver® and SAP® Integration Certifications

InSync Edgware now certified to run on the SAP NetWeaver® platform.

Sunnyvale CA, Sept 1, 2006 - InSync Software Inc. today announced that its Edgware Suite for Sensor Driven Business Networks has been certified to run on the SAP (Public, NYSE:SAP) NetWeaver® platform and has earned the "Powered by SAP® NetWeaver" designation. Additionally with this certification InSync has earned the SAP® Integration Certification for the Edgware product suite. The Powered by SAP NetWeaver® designation is for Java or ABAP applications that have been certified for deployment on the SAP® Web Application Server and for integration of iView® software with the SAP® Enterprise Portal.

InSync's software for Sensor Driven Business Networks adds value by enabling SAP® users to transform sensor data into contextual business events that drive enterprise processes, such as RFID based materials management or physical asset tracking, throughout the supply chain. By achieving SAP® certification InSync is affirming its commitment to its customers and to adding value to SAP® users by enabling seamless integration between the InSync Edgware Applications and SAP NetWeaver®.

"With SAP NetWeaver® integration capabilities, InSync is now in an even better position to help our customers with disparate business partners take advantage of sensor enabled networks," said Ashish Chona, InSync CEO. "The Powered by SAP NetWeaver® certification is an important milestone in InSync's efforts to deliver affordable, complete solutions for the many customers using SAP® products."

"InSync has created a powerful, yet lightweight SOA based solution that can be deployed quickly and cost effectively. This certification represents a substantial value for joint InSync and SAP® customers." Said Ravi Panja, InSync CTO, "InSync will now be able to run the Edgware applications from within SAP NetWeaver®, reducing both the complexity and cost of deploying and managing InSync applications."

InSync's Edgware Suite allows customers to leverage sensor data collected across the business ecosystem to automate business processes. Tools like the InSync SiteManager™ and TrackingServer™ let customers configure, monitor, and manage sensor networks as well as translate raw RFID and sensor data into actionable information relevant to a business and its partners.

About InSync Software Inc.

InSync Software Inc provides sensor-driven business network software. InSync patented Edgware leverages the internet, RFID, and sensor based technology to enable the transparent supply chain; using sensor data to generate events to be used with-in internal business processes or across your business ecosystem.
